## Claims Experience

Handling large and complex claims in The Bahamas since 1997, involving domestic and commercial property losses, contract works claims, products and employer/public liability claims and motor liability claims.

I have much experience of managing catastrophe teams following hurricanes in The Bahamas. In all cases, I endeavour to be well-organized and ensure an efficient method in the handling of large volume claims, in these circumstances. I am an advocate of team building and I am keenly aware of the need to monitor the quality and efficiency of the adjusters' work and to carefully watch their well-being.

I have lived in The Bahamas and know the local customs and insurers/insurance agents very well. I encourage client liaison and meetings during a catastrophe.

## Interests/Hobbies

Sport; avid interest in rugby union, cricket and soccer. I played rugby for Baillou RFC in Nassau until I got too old, and I am an avid supporter of Arsenal FC in the English Premier League. I was a staunch cricketer in my younger days; now I like to watch the England team as often as possible.
